

SAMPLE 1

data

A customer **billing statement**

information

A dashboard of **billing history & payments trends** of the customer.

Overall revenue on a CL account / pool performance.

insight
(usually I address this layer as knowledge)

Is she/he **likely to miss payments** again based on current schedule & trends?

Is the CL account profitable? Is this pool profitable?

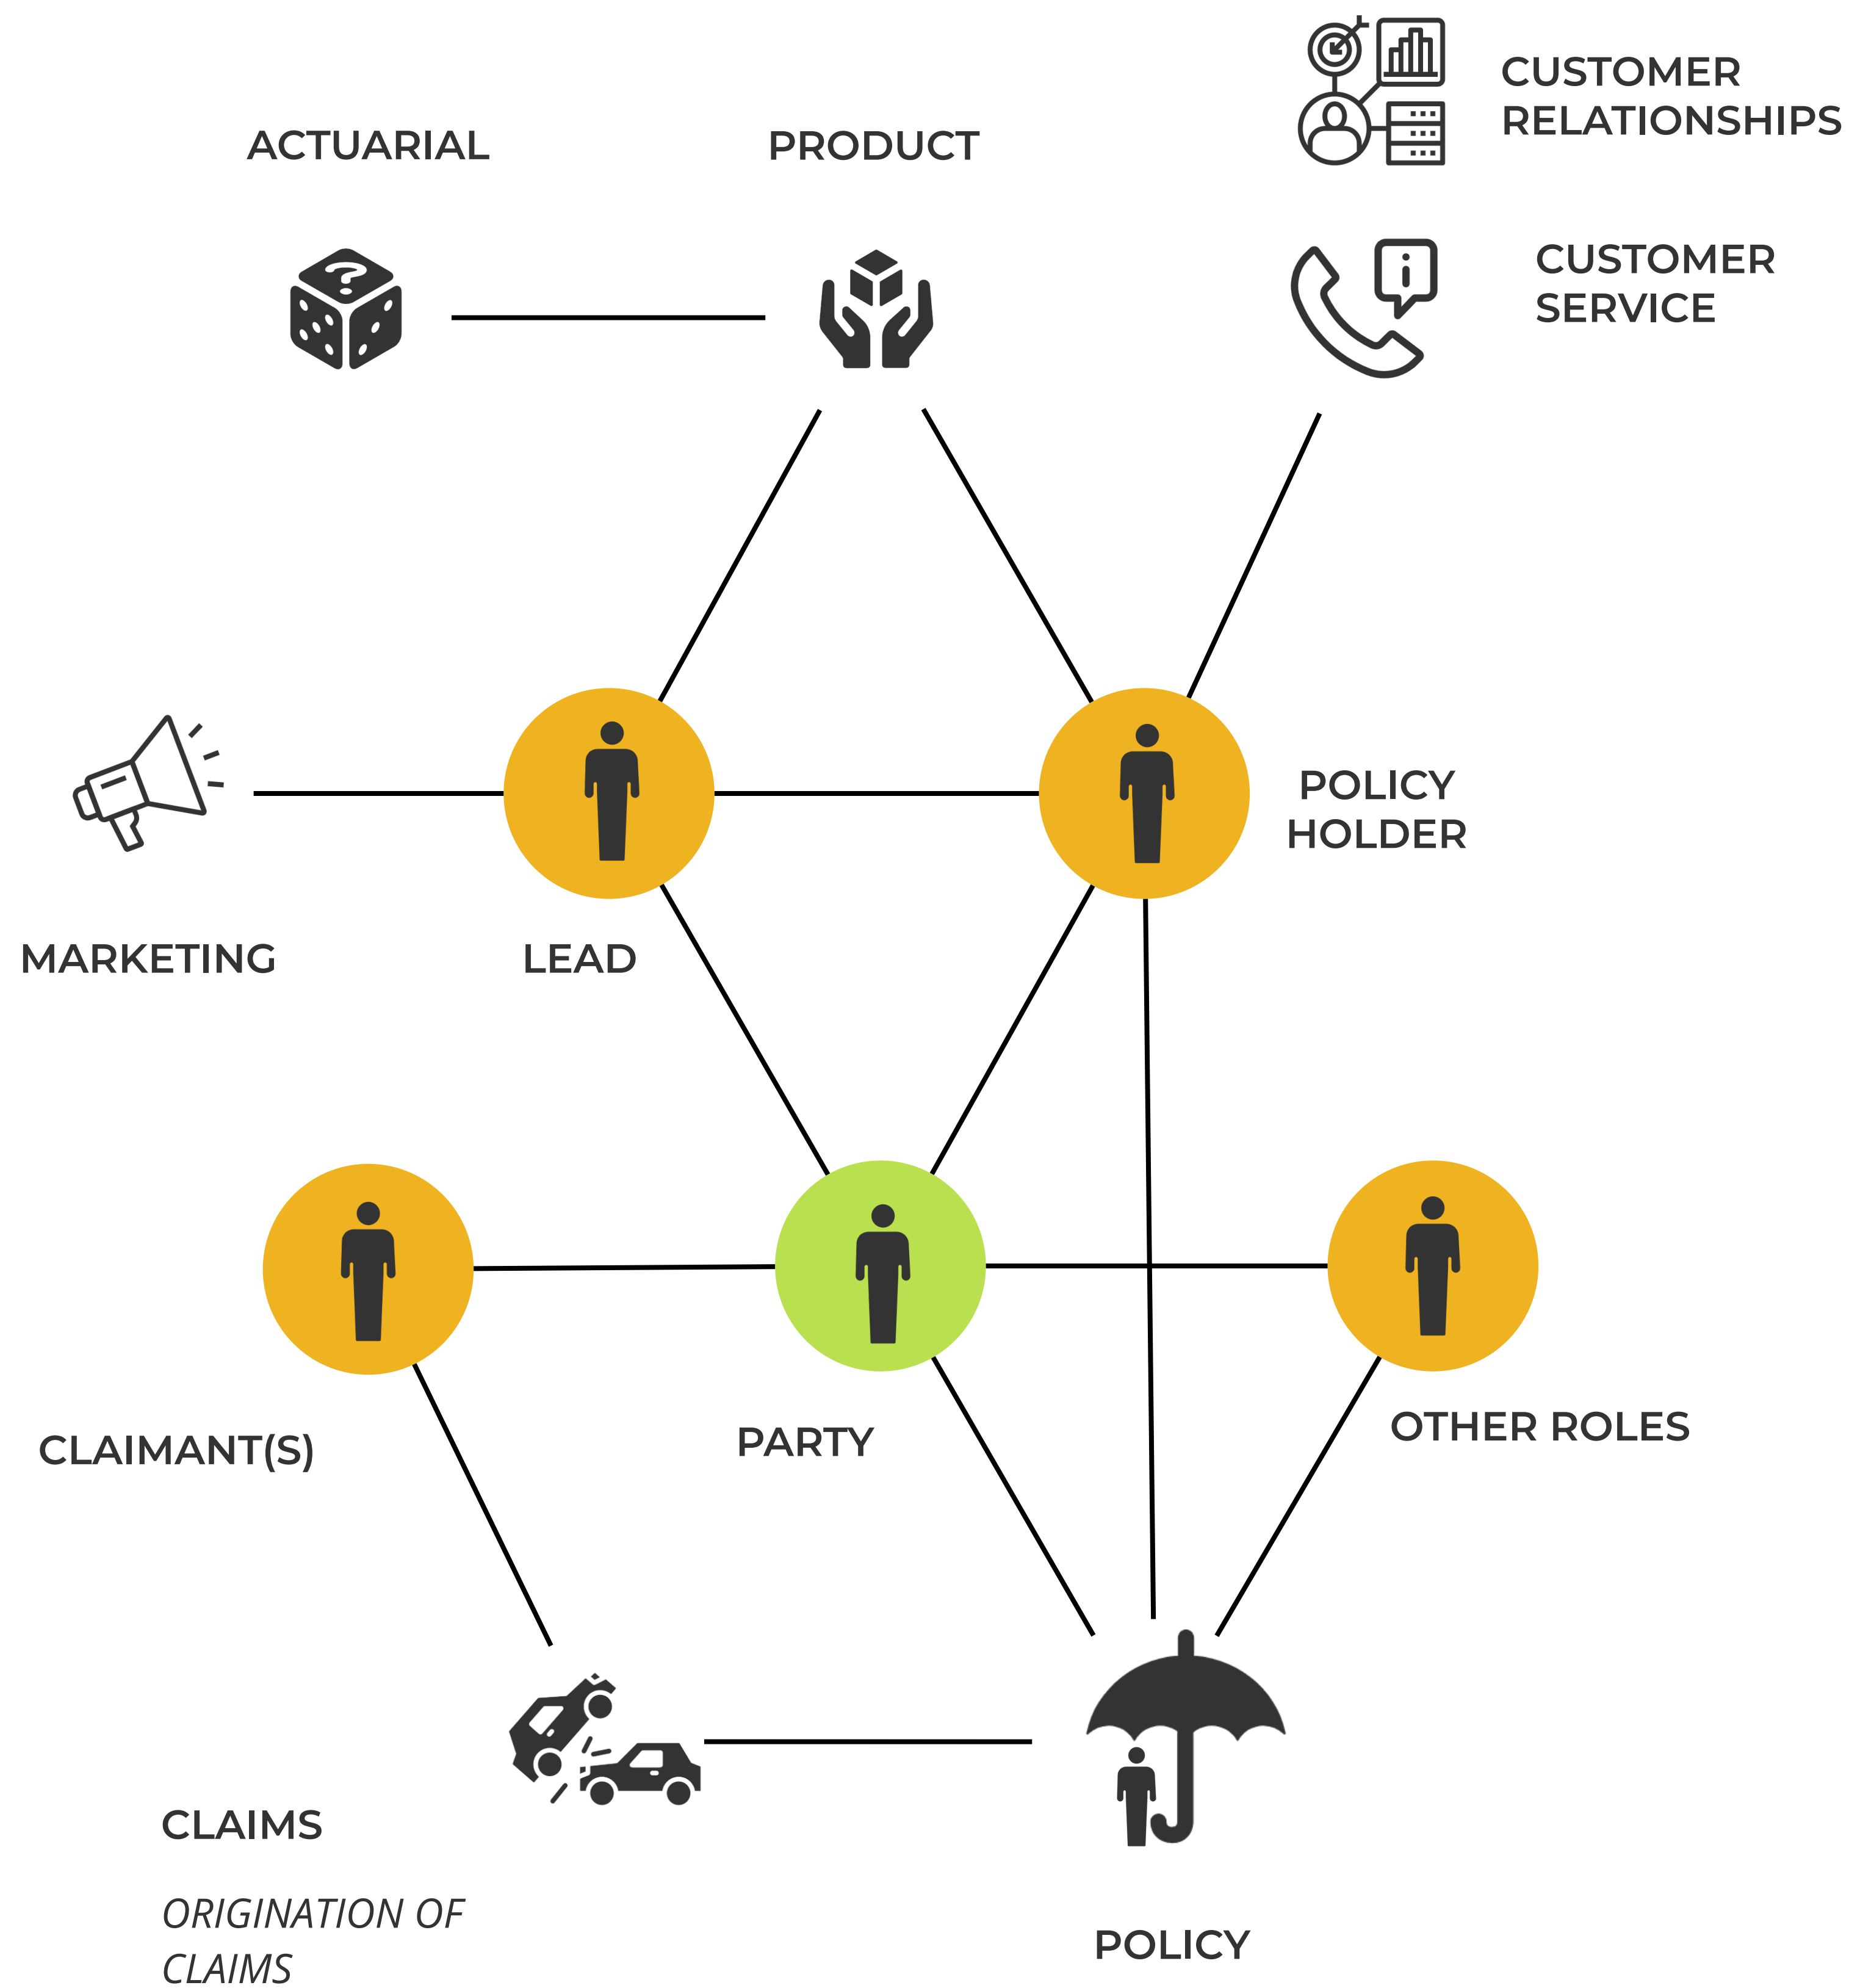

wisdom/experience

Should we, as a company, **write off this account**? Is it worth going after this?

Does get influence from branding drivers. Gets into soft side of data.
